REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: So et al. disclose in Japan Patent No. 10-314,972 simultaneously laser drilling a hole in two major opposing surfaces to create a through hole. None of the references of record discloses or suggests, alone or in combination, a differential diameter hole drilling method in a target material including opposed first and second major surfaces and having a thickness, comprising: generating a first laser output having sufficient energy density over a first spatial spot size to remove target material within a first spot area; directing the first laser output to impinge the target material on the first major surface and thereby forming a pilot hole having a pilot diameter that corresponds to the diameter of the first spot area and that is less than the predetermined diameter of the through-hole; directing the second laser output to impinge the target material on the second major surface and thereby form a through-hole that extends through the thickness of the target material.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geoffrey S Evans whose telephone number is (571)-272-1174. The examiner can normally be reached on Mon-Fri 6:30AM to 4:00 PM, alternate Fridays off.
